

Skype® for Business team admin dashboard for individual forwarding configuration

- Activate different forwarding targets depending on your presence state
- Setup forwardings depending on daytime and day of the week
- Configure forwardings depending on specific calendar periods
- Route calls to specific destinations according to the incoming call number
- Combination of different forwarding criteria is possible
- Routing options can be set globally or per user and are part of the FonComfort™ server

Setup your **forwardings** matching the following criteria.
